

NOTICE: This publication contains parts information for all 1983 Imported Passenger Cars and Pickups.

In the event specifying assistance is required please provide a description of the desired part, the applicable illustration and illustration key number(s), the vehicle model, serial number, and when appropriate, the Trim Code, Engine Number, Transmission Number etc.

The use of this Parts Catalog and the arrangement of information herein is explained in the General Information Section.

## HOW TO LOCATE PARTS

This catalog is divided into groups similar to the Chrysler Domestic parts catalog.

Page INF-1 lists the groups by subject and number. Association of the part being sought with its major functional application will enable the user to determine the group in which the part will most likely be found. Example: Rear Axle Ring Gear and Pinion. By referring to INF-1. It will be determined that Rear Axle is Group 3.

Each group begins with a Fly Page which lists all the graphic illustrations contained in the group. In addition a complete listing of graphic illustrations follows the INF Section.

Part numbers are listed in the text by the "Key number" appearing on the illustration.

To determine the number of a part being sought:

1. Select the appropriate group.
2. Select the illustration applicable to the type of part for assembly.
3. Locate the part on the illustration and determine the "key number".
4. Identify the part number by referring to the "key number" listed in the text following the illustration.

Additional or alternate means of locating parts is provided through the use of the Numerical and Alphabetical Indexes located at the back of this publication.

## PAGE NUMBERING

Two part page numbers are used throughout this publication. The first part of the page number identifies the group and the second part of the sequence within the group. For example:

2-3 indicates Group 2, Front Suspension, Page 3.

In the maintenance of the Loose Leaf Parts Catalog it may be necessary to add information beyond the capacity of the page. If this should occur, an "A" page may be provided; e.g.: 2-3A should be filed immediately following page 2-3.

## ILLUSTRATIONS

Two part illustration numbers are used to locate the graphic in its proper sequence. The first part is the group number and the second part the sequence within the group. (Note: Illustrations will always be on the left hand page and will be odd and even numbered page).

A master index of all illustrations follows the INF Section. In addition, each group fly page includes a listing of the graphic illustrations contained within the group.

## ALPHABETICAL INDEX

To locate a part by name refer to the Alphabetical Index (located at the back of the catalog with page numbers prefixed "AL"). If the name of the particular item sought is not listed, or is unknown, look for the assembly in which it is contained or to which it is attached. The index refers to the graphic illustration which depicts the part.

## NUMERICAL INDEX

To locate a part by number refer to the Numerical Index (located at the back of the catalog with page numbers prefixed "NU"). This section contains a listing of all part numbers contained in the catalog with reference to their location.

## SPECIFYING INFORMATION

The following information is included in this catalog:

1. Part Name
2. Part Number
3. Quantity used per Vehicle
4. Model Application
5. Description and/or dimensions, colors, etc., for proper identification.
6. Effective points for changes.

## SYMBOLS USED IN THIS CATALOG

# preceding a part line key number indicates numbers not previously published.

AR indicates the quantity required may vary or is to be determined by the user.

( ) around a part number following the item being specified indicates interchange with the new number for the part. Prior to ordering, check the current Master Parts List for the bracketed number and, if listed, order that number. Doing so will preclude delay in obtaining the part since the new number may not yet be available when the order is submitted.

## PRODUCT BULLETINS

Product Bulletins may be issued when important changes are made in production or when changes are to be made in a catalog between issues. It is important that catalogs be updated in accordance with information contained in Product Bulletins to insure accurate specifying.

## PARTS CATALOG REVISION SERVICE

Subscribers to the catalog service will be periodically provided with revision copy incorporating the latest information. Revision may be by Page, Group, or by complete book.

Proper interfiling of the revision copy will assure the subscriber of a complete up-to-date catalog.

## PART NUMBER PREFIX

Most Part numbers listed in the catalog are eight characters long and consist of two alpha followed by six numeric characters. Always use both alphas when submitting your parts order.

## KEY NUMBERS

Parts are listed in the text by the "key number" which identifies the item as depicted in the illustration.

When the "key number" is a combination; i.e.: "2-5," the part number is an assembly consisting of the referenced "key numbers" 2, 3, 4, and 5. If the "key number" appears as 2-5, 9 or 2-5 & 9, the part number contains 2, 3, 4, 5 and 9.

## DIMENSIONS

Dimensions listed in this publication are expressed in millimeters. To convert to inches multiply the value shown by .03937. (See Metric Conversion Table)

## METRIC CONVERSION TABLE

### LINEAR MEASUREMENT

1 foot (ft.)	= 12 inches (in.)	1 centimeter (cm)	= 10 millimeters (mm)		
1 yard (yd.)	= 3 ft. = 36 in.	1 meter (m)	= 100 cm = 1000 mm		
1 mile (statute)	= 5,280 ft.	1 kilometer (km)	= 1000 meters		
<b>To convert</b>	<b>into</b>	<b>Multiply by</b>	<b>To convert</b>	<b>into</b>	<b>Multiply by</b>
inches	centimeters	2.5400	centimeters	inches	0.3937
inches	millimeters	25.4000	millimeters	inches	0.0394
feet	meters	0.3048	meters	feet	3.2808
feet	millimeters	304.8000	millimeters	feet	0.0033
yards	meters	0.9144	meters	yards	1.0936
miles	kilometers	1.6093	kilometers	miles	0.6214

### AREA MEASUREMENT

1 square foot (sq.ft.)	= 144 square inches (sq.in.)	1 sq. centimeter (cm <sup>2</sup> )	= 100 sq. millimeters (mm <sup>2</sup> )		
1 square yard (sq.yd.)	= 9 square feet	1 sq. meter (m <sup>2</sup> )	= 10,000 cm <sup>2</sup>		
1 acre	= 4,840 sq. ft.	1 are (a)	= 100 m <sup>2</sup>		
1 square mile	= 640 acres	1 sq. kilometer (km <sup>2</sup> )	= 1,000,000 m <sup>2</sup>		
<b>To convert</b>	<b>into</b>	<b>Multiply by</b>	<b>To convert</b>	<b>into</b>	<b>Multiply by</b>
square inches	sq. centimeters	6.4516	sq. centimeters	sq. inches	0.1550
square feet	sq. meters	0.0929	sq. meters	sq. feet	10.7639
square yards	sq. meters	0.8361	sq. meters	sq. yards	1.1960
acres	sq. meters	4,047.0	sq. meters	acres	0.0002
square miles	sq. kilometers	2.5900	sq. kilometers	sq. miles	0.3861

### CUBIC MEASUREMENT (VOLUME)

1 cubic foot (cu. ft.)	=	1.28 cubic inches (cu. in.)	1 cu. centimeter (cm <sup>3</sup> )	=	1000 cu. millimeters (mm <sup>3</sup> )
1 cubic yard (cu. yd.)	=	27 cubic feet	1 cubic meter (m <sup>3</sup> )	=	1,000,000 cm <sup>3</sup>
<b>To convert</b>	<b>into</b>	<b>Multiply by</b>	<b>To convert</b>	<b>into</b>	<b>Multiply by</b>
cubic inches	cu. centimeters	16.3872	cu. centimeters	cubic inches	0.0610
cubic feet	cubic meters	0.0283	cubic meters	cubic feet	35.3145
cubic yards	cubic meters	0.7646	cubic meters	cubic yards	1.3079

### LIQUID MEASUREMENT (CAPACITY)

1 pint (pt.)	= 28.875 cubic inches	1 centimeter (cl.)	= 10 milliliters (ml.)		
1 quart (qt.)	= 2 pints = 57.75 cu. in.	1 liter (l)	= 100 cl. = 1000 ml.		
1 gallon (gal.)	= 4 qts. = 231 cu. in.	1 kiloliter (kl)	= 1000 liters		
<b>To convert</b>	<b>Into</b>	<b>Multiply by</b>	<b>To convert</b>	<b>Into</b>	<b>Multiply by</b>
cubic inches	liters	0.0164	liters	cubic inches	61.0250
pints	liters	2.1132	liters	pints	0.4732
quarts	liters	0.9463	liters	quarts	1.0566
gallons	liters	3.7853	liters	gallons	0.2642
cubic feet	liters	28.3162	liters	cubic feet	0.0353

### WEIGHT MEASUREMENT

1 ounce (oz.)	= 16 drams	1 centigram (cg.)	= 10 milligrams (mg.)
1 pound (lb.)	= 16 ounces	1 gram (g.)	= 100 cg. = 1000 mg.
1 short ton	= 2000 pounds	1 kilogram (kg.)	= 1000 grams
1 long ton	= 2240 pounds	1 metric ton (t.)	= 1000 kg.

To convert	Into	Multiply by	To convert	Into	Multiply by
drams	grams	1.7718	grams	drams	0.5644
ounces	drams	28.3495	grams	ounces	0.0353
pounds	kilograms	0.4536	kilograms	pounds	2.2046
tons (short)	tons (metric)	0.9072	tons (metric)	tons (short)	1.1023

### POWER MEASUREMENT

1 horsepower (hp)	= 746 watts	7457 kilowatts (kw)	1 horsepower (ps)	= 736 watts	= 7355 kw
<b>To convert</b>	<b>into</b>	<b>Multiply by</b>	<b>To convert</b>	<b>into</b>	<b>Multiply by</b>
horsepower (U.S.)	horsepower (met.)	1.0139	horsepower (met.)	horsepower (U.S.)	0.9863
horsepower (U.S.)	kilowatts	0.7457	kilowatts	horsepower (met.)	0.7355
kilowatts	horsepower (U.S.)	1.3405	horsepower (met.)	kilowatts	1.2596

## ABBREVIATIONS

Abbreviations commonly used in this publication are interpreted as follows.

AR = Use as required	Exc = Except	-- = Negative or Minus	Std = Standard
Assy = Assembly	H/Alt = High Altitude	No = Number	t = thickness
Auto = Automatic	Emiss Control	O.S. = Oversize	Trans = Transmission
Cal = California	L = Length	Pkg. = Package	U.S. = Undersize
Cyl = Cylinder	L.H. = Left Hand	+ = Positive or Plus	V = Volt
E.G.R. = Exh. Gas Recir.	Lt = Left	R.H. = Right Hand	W = Watt or With
Em = Emission(s)	Man. = Manual	Rt = Right	w/o = Without
Emiss = Emission(s)	m.m. = Millimeter	SIA = Service in assembly	/ = With or per
Eng = Engine	Mod(s) = Model(s)		

## BODY NUMBER

The Body Number for the Model 24-44 passenger car is stamped on the right top of the fire wall in the engine compartment.

The Body Number for the Model 23 passenger car is stamped on the top center of the fire wall located in the engine compartment.

The Body Number for the Model 27 Pick-ups is stamped on the sidewall of the frame near the rear spring hanger.

## ENGINE MODEL AND SERIAL NUMBER

The Engine Model is stamped adjacent to the Engine Serial No. on the cylinder block; J Engine (1400cc is G12B for U.S./4G12 for Canada), K Engine (1600cc is G32B for U.S./4G32 for Canada); A Engine (2000cc is G63B for U.S./4G63 for Canada); F & W Engine (2600cc is G54B for U.S./4G54 for Canada). D Engine (2300cc is 4D55 with Turbo for U.S. and Canada).

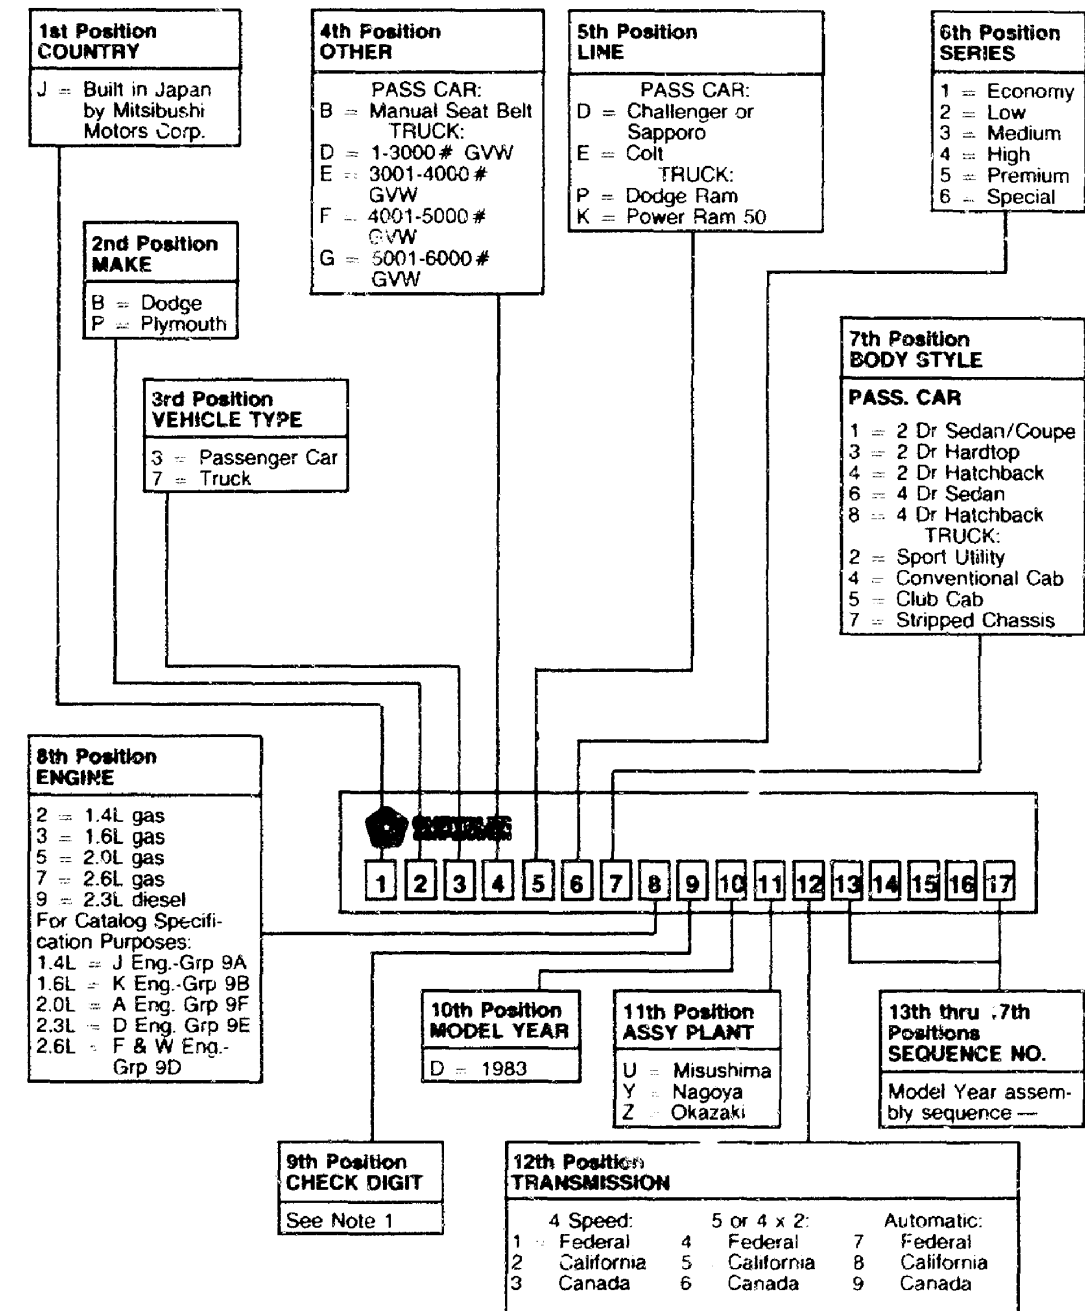

The Engine Serial Number is stamped on top of the cylinder block at the right front corner.

## TRANSMISSION MODEL and SERIAL NUMBER

Mitsubishi transaxle and manual transmission serial numbers are stamped on the clutch housing. Chrysler built Automatic Transmission Identification numbers are stamped on the left oil pan side rail as follows:

TRANS. ASSY. NUMBER	CHANGE CODE	DATE CODE	SERIAL NUMBER
7 Digits 1234567	1 Digit A (Factory use only of no significance to the field)	4 Digits 6367 (Jan. 2, 1979)	4 Digits 0001 (A sequential number for each days' production)

## VEHICLE IDENTIFICATION NUMBER (VIN) DEFINED

**NOTE 1:**  
The Check Digit will be a numeric character 0-9 or alpha X. It is for verification of the accuracy on the VIN through use of a prescribed mathematical formula mandated by Federal Code MVSS 115

**Figure 2-500**

This diagram shows an exploded view of a mechanical assembly. The main components are labeled with numbers 1 through 26. The assembly includes a long, curved arm (1) with a handle (2) and a trigger mechanism (3). The handle has a trigger (4) and a release button (5). The trigger mechanism includes a trigger spring (6) and a trigger pin (7). The trigger pin is connected to a trigger lever (8) which is mounted on a trigger pivot (9). The trigger lever is connected to a trigger spring (10) and a trigger pin (11). The trigger pin is connected to a trigger lever (12) which is mounted on a trigger pivot (13). The trigger lever is connected to a trigger spring (14) and a trigger pin (15). The trigger pin is connected to a trigger lever (16) which is mounted on a trigger pivot (17). The trigger lever is connected to a trigger spring (18) and a trigger pin (19). The trigger pin is connected to a trigger lever (20) which is mounted on a trigger pivot (21). The trigger lever is connected to a trigger spring (22) and a trigger pin (23). The trigger pin is connected to a trigger lever (24) which is mounted on a trigger pivot (25). The trigger lever is connected to a trigger spring (26) and a trigger pin (27).
